

Reliable

Safe

Durability

Applicable Models: DJI M4

Fast, reliable dual-stage payload deployment with full 360° red & blue strobe visibility in harsh conditions.

## Applications

### Firefighting

Signal danger zones and guide emergency response

### Emergency Warning

Instantly alert surrounding areas in urgent situations

### Law Enforcement & Pursuit

Enhance visibility during police and security operations

### Training Exercises

Simulated deployment and alert drills

## Specification

- Dimensions:  $\leq 85 \times 75 \times 35$  mm
- Weight:  $\leq 75$  g
- Power Supply: DC 9–17 V
- Total Power:  $\leq 25$  W
- Drop Points: 2
- Operating Temperature:  $-20^{\circ}\text{C}$  to  $+50^{\circ}\text{C}$
- Protection Rating: IP55
- Control: PSDK / WeChat Mini Program / App Bluetooth
- Lighting: 2-channel red & blue strobe,  $120^{\circ}$  beam angle, full  $360^{\circ}$  visibility around drone during hover, no ground dead zone

C.BK4

Two-Stage Dropping Kit

The C.BK4 is a 2-in-1 device combining a red & blue strobe light with a dual-stage dropper. It is designed to operate reliably under harsh weather conditions. Using the DJI EPORT interface, it can be mounted on DJI Matrice M4 series drones, featuring a 5-second quick bottom-mount installation. The dual-stage dropper allows two payloads to be released separately, with each drop point supporting two deployment modes: strap drop and line drop.

## Key Features:

- Bottom non-invasive installation
- Plug-and-play operation
- Abnormal status alerts
- Mountable without power
- Drop function without power
- PSDK control link
